## General information

This service allows you to get the list of counterparties with information about the access level or the status of access request.

## List of available counterparties

Each personal account may have access to few counterparties, that is, it may have a right to process orders, get information about the settlements and perform other actions on behalf of different counterparties.

This method allows:

- to get basic information about counterparties that are available for certain personal account;
- to get full information about counterparties that are available for certain personal account;
- to get information about rejected counterparties;
- to change the current counterparty in the personal account.

### Method request

#### Request example

Method address: <https://api.dellin.ru/v1/customers/counteragents.xml>

```
<request>
  <appkey>00000000-0000-0000-000000000000</appkey>
  <sessionid>00000000-0000-0000-0000-000000000000</sessionid>
  <cauid>00000000-0000-0000-0000-000000000001</cauid>
  <full_info>true</full_info>
</request>
```

#### Description of parameters

Request

Parameter	R*	Type	Description
appkey	Yes	string	Application key. To get the key, <a href="#">register</a>
sessionID	Yes	string	To get the session ID, use the <a href="#">User Authorization</a> method
cauid	No	string	UID of the counterparty that needs to be chosen in order to perform operations on its behalf during the current session. It's possible to change the default counterparty to the needed one by using this parameter.
full_info	No	boolean	Flag for requesting full information about all available counterparties and the list of rejected counterparties
